**Subject:** Legacy Loans Assets

R a euphuism for assets that aren't worth a dime and sounds very much like something the just retired Republican administration might dream up to fool the American people into believing toxic means legacy. What woose dreamed this one up? The only people who are going to benefit from this remarkably flawed plan are the people who got us into to this situation in the first place. The fox is still in charge of the chicken coop and the government continues to lay golden eggs. The American people get 6 cents and the Wall Street wonder boys get 94 cents out of every dollar you guys prints. We need a strong Secretary of the Treasury who will nationalize the banks, jawbone the criminal Wall Street elite into submission and get this crisis behind us.
